

About the National Center for Nanoscience and Technology and Elsevier

National Center for Nanoscience and Technology

The National Center for Nanoscience and Technology, China (NCNST), established in December 2003, is co-founded by the Chinese Academy of Sciences (CAS) and the Ministry of Education as an institution dedicated to fundamental and applied research in the field of Nanoscience and technology, especially research with important potential applications. NCNST is operated under the supervision of the Governing Board and aims to become a world-class research center, as well as a public technological platform and young talent training center in the field, and to act as an important bridge for international academic exchange and collaboration.

Elsevier

This book has been prepared and published by Elsevier's Analytical Services, part of Elsevier's Research Intelligence portfolio of products and services. For over 140 years, researchers and healthcare professionals have trusted and relied upon Elsevier's portfolio of journals, including iconic publications such as *The Lancet*, *Cell Press*, and *Gray's Anatomy*. Today, Elsevier is a global leader in information and analytics, helping research communities advance science and improve health outcomes for the benefit of society by facilitating insights and critical decision-making for customers across the global research and health ecosystems.
